Sunways Three Phase Storage Inverter with Two MPPT

STH-4K~12KTL-HT

MAX 98.2% EFFICIENCY

IP65 PROTECTION

Max. efficiency up to 98.2%

Up to 110% phase unbalanced output available on both on-grid and back-up outputs.

Support back-up paralleling connection of up to 10 units.

Fast and easy data checking and commissioning via App or OLED display

135~750V wide battery connection range to store more energy and optimize self-sufficiency rate.

Arbitrary phase of back-up output allows up to 125% overloading ability.

Maximum 200% back-up output overloading @60s.

Uninterruptible power supply, switch to off-grid mode within 10ms

- ① The battery configuration range can be lowered to 135V in actual practice.
- ② Max apparent power from the grid means the maximum power imported from the utility grid used to satisfy the backup loads and charge the battery.
- ③ The output power will exceed the rated value only when the power in the PV array is sufficient, and the duration of the overload is relating to the overload power.
- ④ Only one of the three phases can reach up to 1.25 times, and the other two phases should be less than 1.1.
